

MAKA Company Infrastructure Documentation

This document describes the implementation of the Windows Server infrastructure for MAK Company.

Company Departments

Human Resources (HR)
Sales Department
Development Department (DEV)
Information Technology Department (IT)

Domain Infrastructure

Domain Name: maka.local
Primary Domain Controller (PDC): 192.168.1.2/24
Default Gateway: 192.168.1.1

Active Directory Structure

Created separate Organizational Units (OUs) for HR, Sales, DEV, and IT.
Created security groups and assigned users to their departments.

Security Policies

Password expiration after 60 days.
Password complexity enabled.
Password history set to remember last 3 passwords.
Account lockout after 4 failed login attempts for 1 hour.

Group Policy Configuration

Enabled Remote Desktop for domain computers.
Configured Remote Assistance and assigned IT Group as helpers.
Blocked access to external storage devices.
Restricted Control Panel and Task Manager access for users except members of the IT Group.

DHCP Configuration

Scope Range: 192.168.1.40 - 192.168.1.230
Exclusion Range: 192.168.1.80 - 192.168.1.85
Lease Duration: 10 Days

Additional Domain Controller

Configured an Additional Domain Controller (ADC) with IP Address 192.168.1.3.
Configured DHCP Failover between PDC and ADC.

Web Services

Installed IIS Web Server on both domain controllers.
Configured DNS Round Robin load distribution for maka.local using IP addresses 192.168.1.2 and 192.168.1.3.

File Services

Created departmental shared folders for DEV and HR.
Configured required permissions.
Created mapped network drives for department users.
Created a public shared folder with a 2 GB quota.

Print Services

Deployed network printer to domain users.
Configured black and white printing only.
Allowed printing between 09:00 AM and 04:00 PM.

Backup and Recovery

Enabled Active Directory Recycle Bin.
Configured daily server backup at 11:00 PM with backup storage on the ADC server.

Client Integration

Joined Windows 10 client workstation to the maka.local domain.
